DETAILED ACTION

Current Status

1. This action is responsive to Applicants' amendment of 21 August 2007.
2. Receipt and entry of Applicants' amendment is acknowledged.
3. Claims 1-16 are pending in the application.
4. Applicants have amended the claims to overcome the 103 rejection.
5. The obviousness-type double patenting rejection of claims 1-16 is withdrawn following Applicants amendment.

This application is a 371 of PCT/US04/43006 12/17/2004 which claims benefit of 601534,442 01106/2004.

Allowed Claims

Claims 1-16 are allowable over the prior art of record.

Reason For Allowance

The following is an examiner's statement of reasons for allowance: A search of the prior art failed to uncover any reference that anticipates or renders obvious a process for preparing diphenylchlorosilanes by the Grignard process comprising contacting a phenyl Grignard reagent, an ether solvent, a trichlorosilane, and an aromatic halogenated coupling solvent as claimed by applicants.

The closest prior art is Barry, {GB 622970}. Barry teaches a process for making substituted monochlorosilanes of the type $RR'SiHCl$, where R and R' are aryl radicals, by the reaction of $SiHCl_3$ and $R'MgX$ in the presence of diethyl ether or benzene as a reaction medium.

However, Applicants argue that Barry process differs from the instantly claimed process in that Applicants claim a process that employs aromatic halogenated coupling solvent such as chlorobenzene while Barry teach a process that employed benzene as a solvent. Applicants point out that this is a significant difference since the halogenated solvent acts not only as a solvent but also a reactant, and that it would not be obvious to one skilled in the art to substitute chlorobenzene or other halogenated aromatic solvents for benzene. The Examiner found Applicants arguments convincing because Grignard process is traditionally known to employ hydrocarbon solvent or ether solvent as a reaction medium. The two reactions are in different chemical environment, and require different process conditions. These differences are not readily apparent and would not have been suggested to one of ordinary skill.

All claims (1-16) are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
